

NEOWARE THIN CLIENTS OPERATING SYSTEMS—LINUX

OPEN. CUSTOMIZABLE. MOST AFFORDABLE.

Neoware provides the most open, industry standard operating systems available for thin clients—allowing you to protect your investments in technology while minimizing the effects of obsolescence. Using our unique, cross-platform thin client software, enterprises can upgrade devices without changing software, and can upgrade to other operating systems without changing thin clients.

OPEN

Experience greater developmental control of applications and drivers with flexible, open source Linux. Neoware thin clients running Linux offer inexpensive integration capabilities without hefty licensing fees.

CUSTOMIZABLE

Neoware thin clients with Linux provide a PC-style interface to end users, with customizable open source software, and components that offer a multitude of applications, utilities and drivers. You'll wonder how you ever survived without Linux on your desktops. And Neoware has the most experienced Linux thin client engineering resources to support your needs, available globally when and where you need them.

MOST AFFORDABLE

Enjoy the benefits of the most cost-efficient operating system available with modest flash and RAM requirements. More importantly, there are no associated licensing fees. But don't be fooled by its affordability! Neoware thin clients with Linux come loaded with superior performance, and the latest Firefox browser allows easy access to the Internet for Web browsing.

LINUX MADE EASY

Neoware's version of Linux is so intuitive you don't have to know anything about Linux to set up or use Neoware's Linux. With a familiar PC-style interface, end users don't need specialized training to use these thin clients either – just point and click!

BROWSE EFFORTLESSLY

The Linux operating system is available with a Netscape browser or Mozilla's Firefox browser for easy Web navigation. Both options offer a fast, secure and easy-to-use browser. You'll be off and browsing in no time at all.

DUAL HEAD VIDEO

Do you need to support more than one monitor per desktop? Not a problem. Neoware thin clients with Linux include a dual head video option for a wider viewing screen, or for running multiple applications.

NEOWARE KNOWS LINUX

Neoware has shipped more Linux thin clients worldwide than any other vendor. This experience has given us the most comprehensive network of Linux thin client engineering resources available worldwide. And our Linux is finely-tuned to include the latest security updates, kernel and client software versions. At the same time, customers can customize the operating system to meet specific requirements. Neoware can meet your changing business needs with inexpensive, open-source Linux thin client solutions.

OPEN, STANDARDS-BASED TECHNOLOGY

Utilizing open, industry-standard protocols rather than proprietary, home-grown solutions enables Neoware to provide quicker access to the latest technologies from Microsoft, Citrix and other industry leading software providers. As a result, you'll always have access to the latest technology, and won't be locked in to a proprietary solution. That

protects your investment in thin client computing technology from Neoware over the long term.

NEOWARE-CLASS SECURITY

Neoware thin clients with Linux include unique, Neoware-developed enhanced security, which delivers rock-solid performance and reliability in enterprise environments. Neoware security includes a read-only file system that virtually eliminates standard PC viruses and the risks of associated data loss and system downtime.

OPEN, NO-TOUCH MANAGEMENT

Open Management gives you choice, flexibility and lower costs. Every Neoware thin client comes bundled with Neoware Remote Manager, a powerful thin client management tool with a friendly, easy to use graphical user interface. Neoware Remote Manager lets you manage all your desktops – without touching them! Discover, configure, shadow, connection-clone, update and upgrade your thin clients without visiting the desktop. Not only can your Neoware thin clients be managed by Neoware Remote Manager, we also provide software to support IBM Tivoli, Microsoft SMS and Altiris, giving you greater flexibility and the option of using a single management tool to manage both your PCs and thin clients.

GLOBAL EXPERTISE

Millions of people at thousands of companies around the globe rely on Neoware for high-quality products and superior service. Neoware thin clients are open, secure, reliable, affordable, manageable and obsolescence-free. Neoware has the global expertise to help you migrate to thin clients, integrate mainframe applications, remotely manage your PCs, train your people, and create the best possible solutions enterprise-wide. Whether you're new to server-based computing or expanding your network, Neoware professionals located around the world can evaluate your environment, recommend the optimum solution, and implement that solution on time and on budget.

NEOWARE THIN CLIENTS OPERATING SYSTEMS—LINUX

SOFTWARE CONFIGURATION

OPERATING SYSTEM	Linux
SECURITY FEATURES	Read-only file system, locked-down user accounts, multiple levels of interface lockdown, administrator password, kiosk-mode browser
CLIENT SOFTWARE	
CITRIX ICA	•
Web Interface (NFuse)	•
Program Neighborhood	From server
PN Agent	•
Secure Gateway	•
RDP	•
HOST ACCESS	
TeamTalk Host Access	•
Emulation of 30 Terminals	
Genuine IBM 3270/5250	Option
WEB BROWSER	Netscape Navigator, Firefox (snap-in)
PLUG-INS	
Adobe Acrobat Reader	Snap-in
Real Player	Snap-in
Shockwave	Snap-in
Macromedia Flash	Snap-in
JAVA / JVM	IBM and SUN JVM snap-ins
VNC SHADOWING	•
EZCONNECT CONNECTION MANAGER	•
PPP / DIAL-UP-NETWORKING	Snap-in
X.11R6/XDM	•
CUSTOMIZABLE	•
THINPRINT	Snap-in
OTHER	Autostart/auto-restart connections, kiosk-mode browser, multiple-level lock-down user interface

MANAGEMENT

NEOWARE REMOTE MANAGER	
Remote Updates	•
Scheduled Updates	•
Device Discovery	•
Asset Management	•
Remote Shadowing	•
Remote Snap-ins	•
ezUPDATE	
Auto-Updates	•
Auto-Configure	•
Group and Device Profiles	•
OPEN MANAGEMENT	
Altiris	•
IBM Tivoli	•
